

## Integrated Environmental Management System (EMS) Database

“An efficient and sustainable solution to managing your compliance risk allowing you time to focus resources on your core manufacturing business.”

### Steps to Efficient Compliance Management

- EarthRes Group’s regulatory experts identify key compliance needs for your sites.
- EarthRes Group organizes compliance monitoring workflow into simple task assignments or a schedule.
- EMS monitors the task status and sends notices to personnel.

### Features:

- Email notifications to resources with task assignments
- Single view of multiple facilities
- Utilizes existing IT infrastructure
- Web-based access
- Documents in electronic format

### Benefits:

- Reduced risk of non-compliance
- Improved productivity and efficiency
- Supports compliance standards across multiple sites
- Defines and tracks performance metrics
